The November RSBITE meeting has been traditionally held as a joint meeting with SoCal ITE at Cal Poly Pomona every year. This year November with no exception, RSBITE and SoCal ITE has brought the meeting to The Restaurant at Kellogg Ranch at Cal Poly Pomona again. The meeting is joined with professionals from industries, local and regional agencies, and students and faculties from Cal Poly Pomona. This year’s Western District Young Professional Achievement Award winner is Neelam Dorman.

While the crowd enjoys the great food served by the Cal Poly Pomona Hospitality Management, our speaker Patricia Watkins from Metrolink gave a presentation about Metrolink, future expansion, and safety. Metrolink has 512 miles commuter rail system across six counties of Southern California including the operations of Amtrak and freight trains. It consists of seven lines and 55 station with 165 metrolink trains. There are 817 total grade crossings with at least 451 at grade, 160 below grade, and 206 above grade. Metrolink was created in 1991 by state law to establish regional rail system for Southern California. It was originally joint by five member agencies, LACTC, OCTA, VCTC, RCTC, and SANBAG. SANDAG then joined to expand the rail system all the way to San Diego County. Currently, RCTC is expanding the Perris Valley Link. San Bernardino will extend the commuter rail to Redlands in the future. Metrolink has ongoing 70 projects at any given time that are in collaboration with Caltrans and associated local agencies. Safety is a top priority in Metrolink’s daily operation for the customer and workers. At grade crossing guidelines are used by designers to apply the best industry standard to fit the at grade crossing design. Patricia strongly suggested coordination and communication from multi-discipline is necessary to produce the design properly. Vehicle gates, pedestrian channelization with gates, and raised median islands are designed to maintain safety while trains cross the road. Traffic signal and rail signal are in coordination to facilitate the safety. Train collisions are often caused by human errors and speeding. The Positive Train Control is a system that monitors and controls train movements in the rail network as an attempt to improve safety. For instance, it can stop all the trains in the system if there is an earthquake. There are three communication systems utilizing fiber optic, microwave, and commercial Telco. In case one fails, the next one will continue provide reliable operation.

#tbt to our last meeting at the Restaurant at Kellogg Ranch at Cal Poly Pomona. It was great to see so many students and Bronco alumni in attendance! @cppengineering is doing a great job of raising up the next generation of civil engineers. Southern California transportation is surely in good hands for years to come!

The joy of the holiday season was kicked off at the Los Coyotes Country Club on December 9th, 2015. The seasonal Holiday Mixer was a joint event hosted by ITE SoCAL, RSBITE, and OCTEC. Members from three organizations attended to network, celebrate with their peers, and use this valuable opportunity to interact with members of the boards of each of the organizations. This seasonal event featured great appetizers and beverages, casino games, and raffle games with the grand price of a trip to Vegas.

A big thank you to the vendors who supported the joint SoCal ITE, OCTEC, and RSBITE Holiday mixer held on December 09, 2015 at the Los Coyotes Country Club.

Econolite and McCain have committed to co-sponsor the name badge holders and Rodefx has committed to sponsoring the Wi-Fi.
RSBITE 2015-2016
Sponsorships

GET YOUR NAME IN FRONT OF YOUR CUSTOMERS ALL YEAR LONG!

As a product manufacturer or distributor, you want your customers to see and hear your company name as much as possible, and our Section has a long list of activities to plan. By partnering at the start of our year, your company will be featured repeatedly in our communications to our members, on our brand-new Website, and at our meetings.

Your sponsorship goes to support:
- Subsidizing public-sector members’ attendance at luncheons
- Activities and equipment for Cal Poly Pomona’s ITE student chapter
- Plans to start a new student chapter at Cal Baptist University
- And many more initiatives!

For more information, please contact:
Gianfranco Laurie, RSBITE President, (760) 323-8523 x8372
Gianfranco.Laurie@palmsprings-ca.gov

To Whom It May Concern:

We are pleased to announce that next year Cal Poly Pomona will be hosting the ITE Student Leadership Summit for 2016. The “SLS” was hosted by Cal Poly SLO and Sacramento State respectively. They both did a great job providing an interactive summit that brought leadership, students, and professionals together for 3 days. This year Cal Poly Pomona has the chance to carry the torch and plan a summit just as great as our predecessors. It will be on the weekend of January 22nd at the Cal Poly Pomona campus. This early date allows for the Western District of ITE board to join us and take some stress off the semester schools since they will still be on winter break.

With 100 students attending last year, and some being turned down due the limit we plan on having a bigger event that is able to accommodate the leadership development in ITE students in the Western District. Due to the large event size we need your help with the financial burdens we are currently facing. ITE CPP has made a sizable donation allowing us to secure down payments for the event. With your donation we will make this event possible.

Please see the attached Sponsorship Tier and Commitment Forms as you consider sponsoring this event. At your earliest convenience, please use the enclosed return envelope to return the Commitment form and your sponsorship payment to us. Please note that payments are due at the time of commitment. If you have any future questions you can contact us at the emails listed below, or through our website at www.cpp.edu/~ite.

Sincerely,

Nigel Antony
